

Dear Partners,

As any other project, Safe Host had a beginning and will have an end.

And in its ending, Safe Host already includes the beginning of a new project ["disseminate results and test, on a daily basis, the efficiency of tools made available by those working in the tourism sector"](#).

The additional implementation of this project is the possibility "for everyone" to access the course content. Anyone registering will be able to follow the InFormation course and will have at his disposal the whole multimedia "library" on the following website:  
<http://www.safehostfilcams.org/>

Certificates showing completion of the InFormation course will be obtainable only by those working in the tourism sector.

We should have as a minimum the following objective: each partner must assure at least two participants will follow the InFormation course by May 2014.

[You may download the Safe Host banner here:](#) let's publish it on our website's home page.

The following are documents, multi-language videos and presentations available on our portal.

E-PUBLICATION: **325** files and multi-media content  
[ENG](#) [ESP](#) [ITA](#) [HUN](#)

[Documents](#)  [Presentations](#)

Let us disseminate this information among our affiliates, in particular those working in the tourism sector.

The Project staff

[safehost.project@gmail.com](mailto:safehost.project@gmail.com)

The project has been co-funded by the European Union (referral number: VS/2013/0405)
